EXPERIENCE

Jun 26 - Present — SOVRANO AI — BARCELONA, SPAIN

AI evaluation company building benchmark datasets used by leading AI labs to measure model business reasoning

AI Scholar and Evaluator

- Authored and blind-graded executive-decision scenarios in the Product & Tech domain for EuroExec, Sovrano's expert-graded benchmark of frontier AI on European executive reasoning
- Engineered evaluation prompts embedding real regulatory and competitive "traps" to test genuine EU domain depth over surface fluency, feeding benchmarks AI labs use to report model capability
- Calibrated scoring standards through inter-annotator agreement checks and stress- tested Sovrano's internal AI products as an end user

Aug 21 - Jul 25 — AB INBEV - BUDWEISER BREWING GROUP UK&I — LONDON, UNITED KINGDOM

Biggest brewer in the world with annual turnover of $60billion and +155k employees

May 24 - Jul 25 — *Sales Intelligence Manager*

- Managed and mentored a 5-person analytics team, owning priorities and delivery across the On-Premise (bars and restaurants) commercial reporting suite
- Innovated churn reduction strategy in the On-Premise by leading development of a churn prediction model with 81% accuracy, contributing to a 3% reduction in customer attrition
- Designed and directed launch of real-time performance dashboards across On-Premise (bars and restaurants) subchannels, covering three core commercial metrics enhancing visibility and empowering teams with timely strategic insights
- Led migration of 5+ legacy Excel-based workflows to Azure Data Factory and Power BI, reducing data processing time by 60% and cutting dashboard delivery from month and a half to a week
- Created a consolidated “hitlist” dashboard for sales, centralizing site-level priorities to improve visibility, boost install volumes by 16%, and reduce churn through sharper targeting

Feb 24 - May 24 — *Capitalisation and Digital Transformation Manager*

- Led weekly CAPEX spend analysis, presenting actionable insights to senior executives, fostered a cost-conscious culture achieving lowest recorded costs, optimizing 35%, alongside highest-ever quarterly installation volume
- Launched DraftVision (draftvision.co.uk), industry’s first B2C platform to digitize and monetize On-Premise (bars and restaurants) operational workflows, projected to generate $5M in revenue by 2027

Jan 23 - Jan 24 — *Business Analyst*

- Constructed data pipeline for weekly and monthly financial reporting, enabling proactive budget oversight and strategic interventions contributing to 107% achievement of install plan
- Identified inefficiencies in technician deployment through operational analytics, driving a regional restructure improving operational efficiency by 7% and promoted technician productivity by 3%
- Developed and implemented a route optimization tool to decrease technician travel distances, increasing productivity by 2% and avoiding $450K in external development costs

Aug 21 - Dec 22 — *Junior Data Scientist*

- Developed automated workflows enabling seamless integration and near real-time tracking of KPIs and performance metrics to refine operational efficiency by 6%
- Directed integration of image recognition technology in On-Premise (bars and restaurants) channel, revamping compliance tracking and optimizing technician worktime by 32%

Nov 17 - Aug 20 — PERNOD RICARD — LONDON, UNITED KINGDOM

World’s second-largest producer of wine and spirits with annual turnover of €12billion and +19k employees

Mar 20 - Aug 20 — *Strategy and Business Development Analyst - Irish Distillers* — *Dublin, Republic of Ireland*

- Built and managed a market share dashboard enabling real-time performance tracking and competitive benchmarking across 30+ markets contributing to more agile market response strategies
- Created a simulation model to forecast sales impact from increased distribution and velocity, helping prioritize trade investments and identify high-ROI growth levers such as promotional packs influencing annual planning cycle

Jun 19 - Dec 19 — *Revenue Growth Analyst - Pernod Ricard Global Travel Retail* — *London, United Kingdom*

- Constructed company's first pricing dashboard using website-scraped data to elevate data quality and equip business with insights to address critical pricing questions across domestic and duty free markets
- Devised and maintained a centralized pricing database facilitating integration of financial and external price benchmarks to manage

strategic and tactical planning and track ROIs for +20 brands

Nov 17 - Nov 18 *Public Affairs and Communications - Chivas Brothers* *London, United Kingdom*

- Established a management information system to track global developments across +20 countries and assess implications for spirits industry
- Evaluated impact of targeted media placements across +10 brands and coordinated events such as Responsib'All Day to showcase company's sustainability initiatives in local communities
